Tee Box dial: supplier specification

Fairway & Dials · dial for a 38–40 mm field watch · version 1, November 2026

Request

Please quote:

1. Samples: 3 pieces of each variant below, with sample cost and lead time.
2. Production: unit price at 100 and 300 pieces per variant, plus any printing plate or tooling cost, MOQ and payment terms.

Artwork is supplied at true size with all text converted to outlines. Please confirm whether you can hold the minimum feature sizes listed under Critical dimensions.

Dial

Item	Specification
Diameter	28.50 mm
Movement	Seiko NH38 (no date) or NH35 (date). Dial feet and centre hole to the movement standard.
Crown position	3 o'clock
Construction	Sandwich: cream top plate with the hour markers cut through; green lower plate visible through the cuts
Top plate finish	Matte lacquer, cream (screen reference `#f3efe4`); match to our approved swatch
Lower plate finish	Matte lacquer, green (`#1f4d36`). Please also quote a lume-filled lower plate (C3 or BGW9) as an option.
Total thickness	Please recommend; tell us what the movement and case allow

Variants

Variant	Movement	Difference
No date	NH38	Large tee marker at 3
Date	NH35	Date aperture at 3 replaces the tee: 3.90 × 2.92 mm, centred 10.84 mm from the dial centre, with a 0.24 mm printed ink frame. Please confirm the position against the NH35 date wheel.

Print colors

Five pad-print colors on the top plate. Hex values are screen references only; Pantone values are suggested starting points. Please match to physical swatches and send a color proof before the run.

#	Color	Screen	Suggested	Prints
1	Green	`#1f4d36`	Pantone 3435 C	Minute track, "Fairway", "Dials", "Tee Box", rim of the cup at 6
2	Brass	`#b98a3f`	Pantone 871 C (metallic)	The ampersand in the wordmark
3	Ink	`#0f1612`	Pantone Black 7 C	Inside of the cup at 6; date window frame
4	White	`#ffffff`	Opaque white	Golf ball on the 12 o'clock tee
5	Warm gray	`#a39a86`	Pantone Warm Gray 7 C	"AUTOMATIC"; ball outline and dimples

Cost option: if five colors is expensive, ink and green can merge (cup and frame printed green), leaving four.

Critical dimensions

Feature	Size
Minute track	60 ticks, 0.12 × 0.61 mm, centred on a 13.40 mm radius
Tee markers (cut)	Large: 3.29 mm long, 1.83 mm head (at 12, 3, 9). Small: 2.19 × 1.34 mm. The pointed tips may be blunted slightly if needed.
Golf ball	1.27 mm diameter, white, sitting on the 12 o'clock tee
Cup at 6	2.68 × 1.10 mm ellipse, centred 11.21 mm below the dial centre
"Fairway & Dials"	Fraunces, cap height 1.19 mm, baseline 6.09 mm above centre
"Tee Box"	Fraunces, cap height 1.45 mm, baseline 3.65 mm above centre
"AUTOMATIC"	Jost, cap height 0.72 mm, baseline 8.04 mm below centre
Thinnest printed line	0.10 mm (ball outline). The wordmark's serif hairlines are finer; tell us if they need thickening.

Hands (for reference)

Hands are quoted separately, but the dial is designed around them:

- Hour and minute: dark ink batons with a cream lume stripe.
- Seconds: thin dark ink hand with a small brass pennant 5.1–6.6 mm from the centre. Its tip must reach the cup at 6: about 11.5 mm from the centre. At 30 seconds the hand reads as a flagstick standing in the cup.
- Centre cap: white, styled as a golf ball.

Files

In `designs/tech-pack/tee-box/`:

File	Use
`tee-box-no-date-sandwich.pdf` / `.svg`	Factory artwork, no date. One layer per print color, a magenta cut layer and non-printing cyan guides.
`tee-box-date-sandwich.pdf` / `.svg`	Factory artwork, date.
`tee-box-no-date-flat.pdf` / `.svg`	One flattened image, exactly 28.5 mm wide, for printing onto a blank dial (prototype "mule").
`tee-box-date-flat.pdf` / `.svg`	The same for a blank dial with a date window at 3.
`proof.svg`	Enlarged proof of both variants with the layer legend.

The SVG layers open as named layers in Illustrator and Inkscape. Rebuild every file with `python3 designs/tech-pack/generate_print.py`.

Print proof

Tee Box dial · print proof

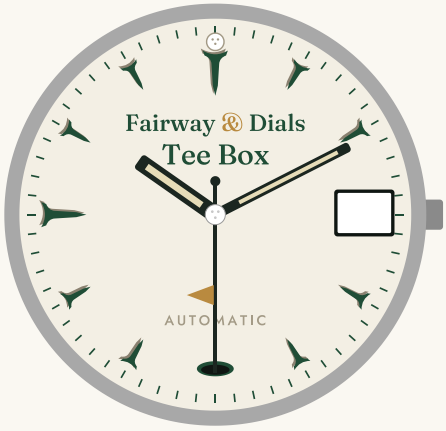

Fairway & Dials · 28.5 mm · sandwich construction

1 · Finished dial

How the dial will look in the watch. Hands are shown for reference at 10:10:30, with the seconds flag in the cup.

No date · NH38

Date · NH35

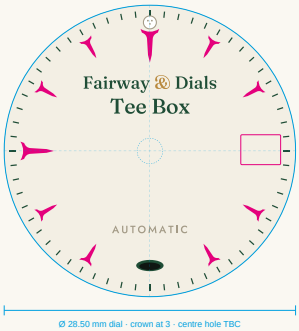

---

2 · Production layers (for the dial factory)

Technical view, not a color render. Magenta marks where the top plate is cut through; on the finished dial the green lower plate shows through.

No date · NH38

Date · NH35

- Top plate base
- Cut through top plate
- Lower plate (through cuts)
- Print: green
- Print: brass
- Print: ink
- Print: white
- Print: warm gray
- Guides, not printed

Text is outlined. Colors are screen references: match to physical swatches before printing. Date window position to be confirmed against the NH35 date wheel.
