Tee Box seconds hand: flag template (print at 100%)

Check scale: the bar below must measure 50 mm. All sizes in mm.

1. Flags to cut (1.96 × 1.46 mm). Cut on the outer edge of the line.

2. Lay the hand on this ruler with its hole on the circle.

Flag sits 5.1–6.6 mm from the centre, on the right of the hand when it points to 12.
Trim the tip with a fine file, re-measure with calipers, touch up the end with black paint.
Keep the flag light: vinyl or foil, the smallest dot of glue. At :30 the tip should sit in the cup.
